Our T80 series is a stocked range and is designed for functionality without compromising style by clustering of workstations. The picture above is an 'X' cluster and other shapes, 'L', 'T' & 'U' can be used to create the perfect layout for your office. Partitions are used at varying heights to enable you to customise how much noise reduction and privacy is required for your team/s. The T80 partitions have many colours of fabric, wood, glass, polycarbonate and metal panels to decorate to suit your office decor.

The T80 system has the ability to be completely softwired internally, this allows for neat and close at hand power and data integrated into each workstation with the minimum use of an electrician.

T80

Series 801.....

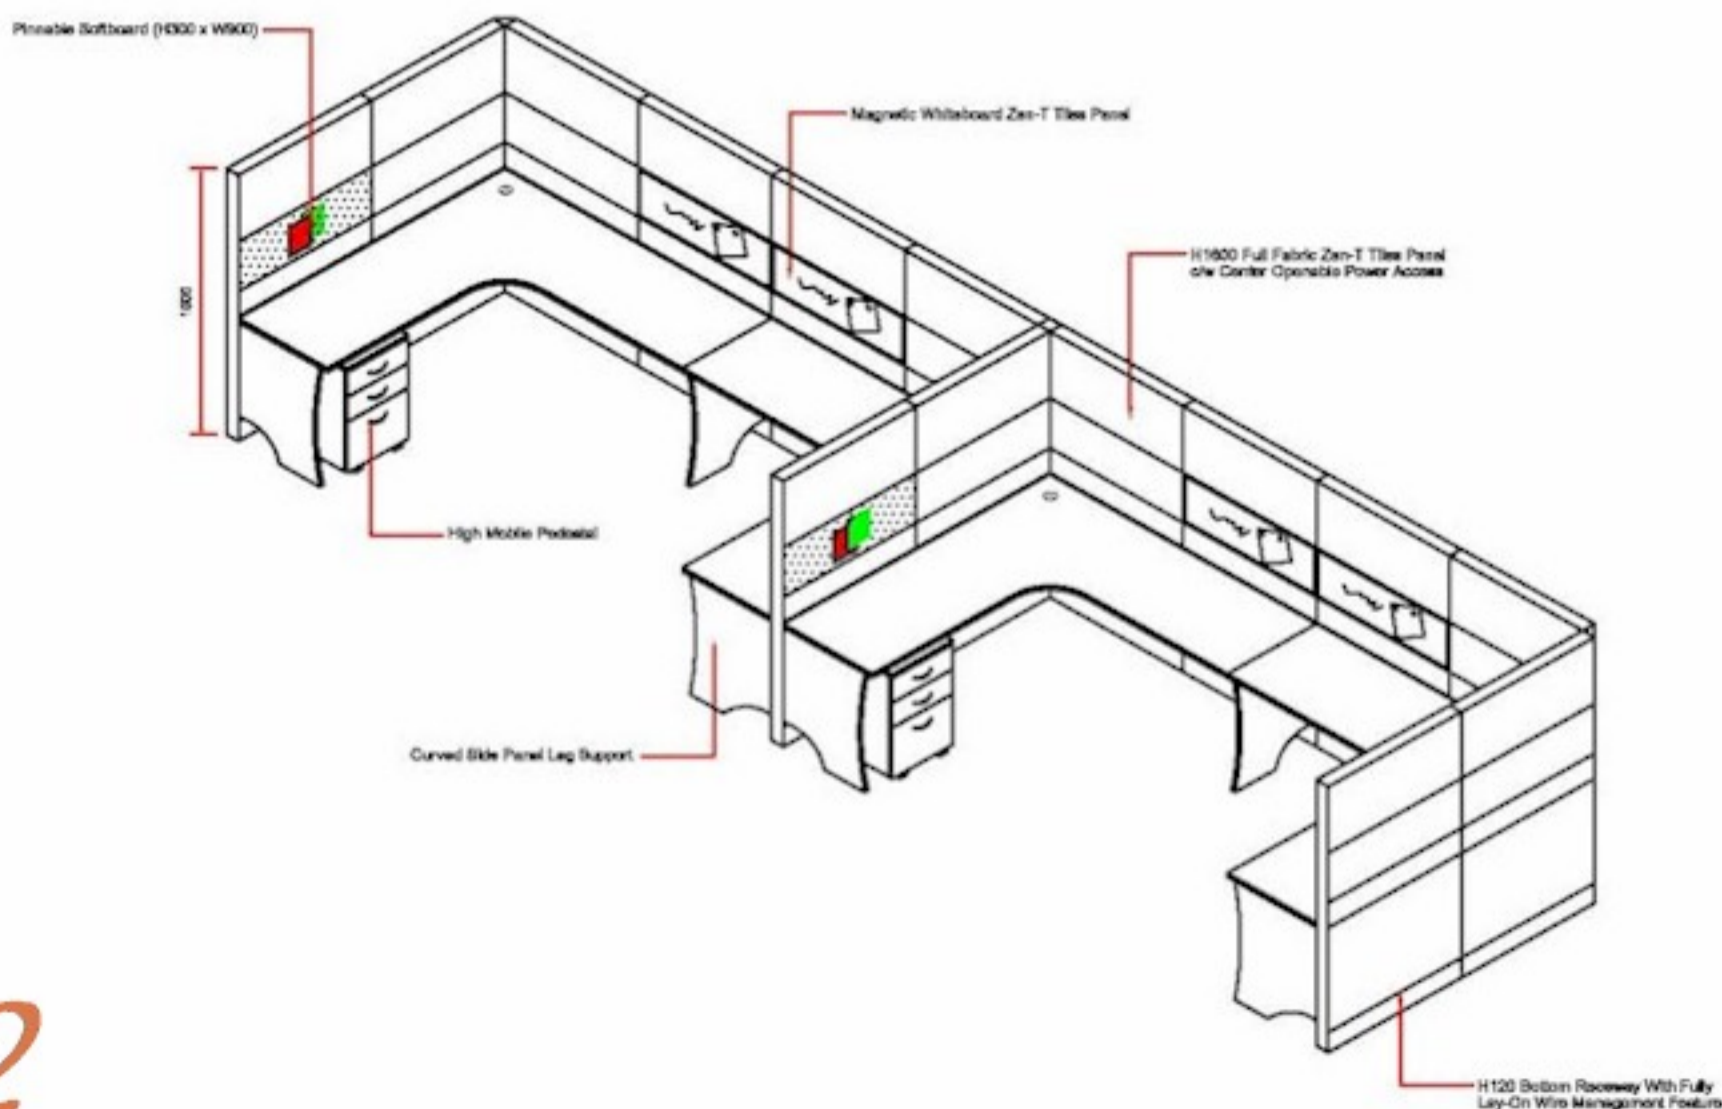

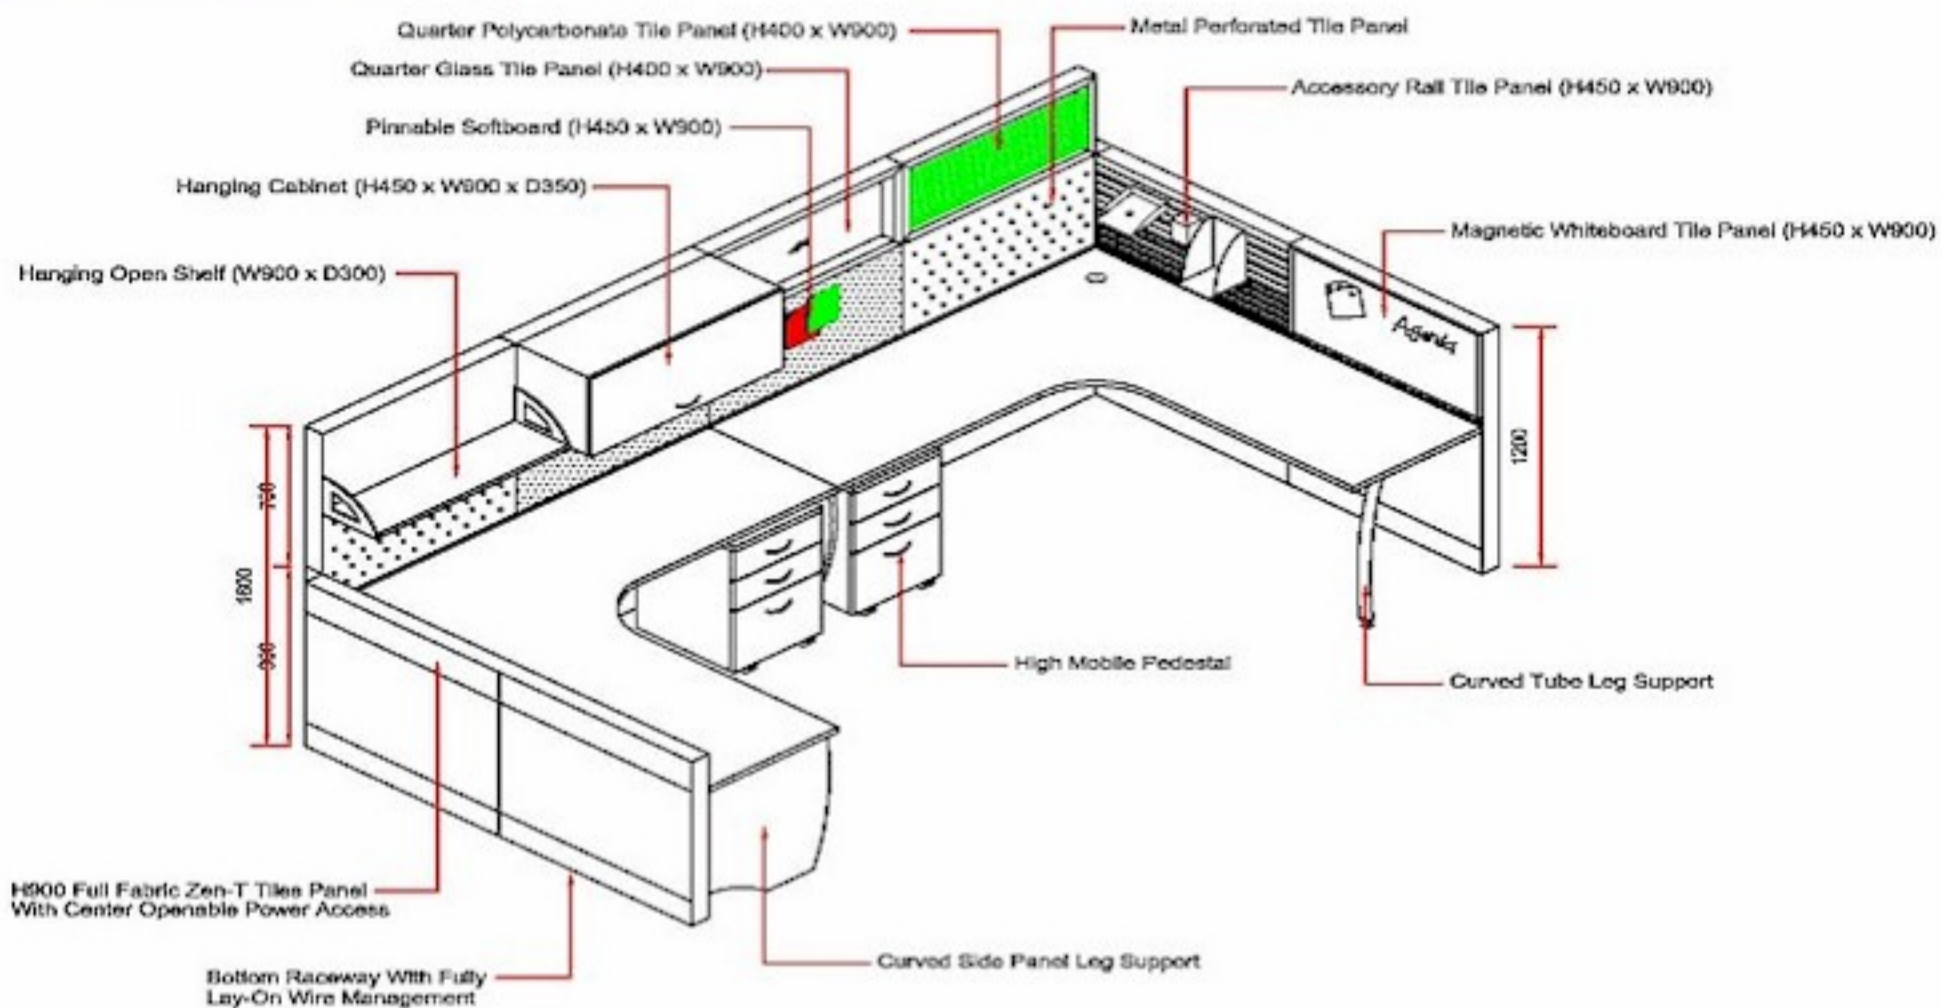

Our T80 system comes in standard size of 1800 x 1800 but can be manufactured in any size required. This system can be configured to any layout, with sharing of partition panels the cost can be kept down and there are many options available; glass, fabric, polycarbonate and metal tiles, whiteboard and pinboards, metal hanging shelves & cupboards, accessory panels for pens, files and phones to keep the desks tops clear. Call us on 08 9470 3926 for a free measure and quote for your new office furniture.
